

REHASENSE

Approach to environment (July 2021)

The REHASENSE Group understands that environment is a critical issue for our business, and we are committed to playing our part in global efforts, based on below environmental principles:

- ✓ support a precautionary approach to environmental challenges;
- ✓ undertake initiatives to promote greater environmental responsibility;
- ✓ encourage the development and diffusion of environmentally friendly technologies.

Including above principles in business planning process we ensure that management of environmental impact remains an integral part of our operations and supports below actions:

- ✓ Responsible production: Our portfolio includes premium line of rollators with a long lifetime. We reduce waste through prevention, reduction, recycling and reuse in whole supply chain.
- ✓ Responsible consumption: We ensuring sustainable consumption patterns and reducing our environmental footprint on nature by changing the way of consume, including device reuse.

The REHASENSE Group is committed to:

- Continuously reviewing and improving our environmental performance.
- Ensuring our compliance with local and national environmental legislation and regulations, focusing on effectively utilizing resources, energy, minimising waste, and preventing pollution everywhere we operate.
- Ensuring that our suppliers, service providers and contractors, as well as other key business partners, help us to support and uphold the environmental standards that we share.

REHASENSE will perform above commitments faithfully and accept the supervision from employees and society.
