

QUALITY POLICY

REHASENSE

Rehasense manufactures a wide range of high-quality mobility products for those with mobility challenges in our communities. We provide superior products within a “best of the best” concept about quality and function based on many years of experience in design, manufacturing and distribution in Europe and Asia.

Our mission is to satisfy the individual needs of customers with the high-quality products and after sales service.

To meet our clients’ requirements, we commit to achieve the following goals:

- implementation and maintenance of the effective Quality Management System according to ISO 13485 and ISO 9001,
- application and respect of new medical device regulation,
- realisation of on-time delivery,
- analysing the customer’s needs and expectations,
- building and maintaining lasting relations with all our clients and partners,
- proactive quality management for continuous process improvement,
- building and maintaining a positive and fair company culture.

Each member of the Rehasense team is aware of this Quality Policy and is responsible to realise the quality targets in their daily work.
